RE: Genetically Engineered Foods

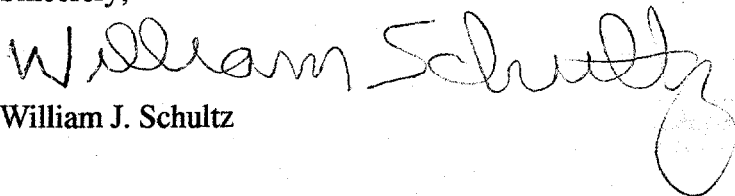

Dear Ms. Henney,

I am urging you to take immediate action to not release new genetically engineered foods or products with genetically engineered ingredients until there is required long term safety testing.

We must require great caution in the development of GE foods, including pre-testing and labeling of new products, corporate accountability to consumers and public regulation.

All GE foods presently on the market should be labeled, to give consumers the right to know what's in the food they are eating

Sincerely,

William J. Schultz
